Dipl.-Ing. Dr.techn. Rupert Nagler, born 1951, studied Computer Science and Psychology in Vienna. He finished his work as assistant professor with a doctoral thesis on interactive systems. Since 1980 he was chief information officer at BML AG in Austria with subsidiaries in many European countries. Since 1985 until 1990 he was on the board of directors of BILLA AG, the largest retail chain in Austria, responsible for logistics, organization, and EDP.

1990 he founded the *INFORMATION DESIGN INSTITUTE*. As an independent consultant for Holistic Information Management he works for medium to large companies in Europe. His projects are carefully combined actions of project management, corporate culture, individual coaching, organizational development, communication, and networking. In many large projects he successfully implemented information systems, databases, corporate networks, eCommerce solutions and ECR/EDI systems. 1999 as a director of the board he organized the merger of many different European regional companies into one large european-wide high-quality Internet Provider EUNET International Ltd. Since 2001 he is responsible for promoting and funding the internet in Austria as director of the Internet Private Foundation Austria (IPA).

Beside his lectures at the Technical University in Vienna, Austria, Dr. Nagler's preferred topics are: information management, organizational development, Efficient Consumer Response, eCommerce, B2B Electronic Data Interchange, logistics and retail information systems, management of complex EDP-Projects, Open Systems, Client/Server, Relational Databases, Data Warehouses, Simulation and the changeover to EUR-currency.
